- Personal Training Qualification
- Performing CBCT and X-ray imaging

## EDUCATION

2019 - 2023

ANGLO-EUROPEAN COLLEGE OF CHIROPRACTIC UNIVERSITY

Master of Chiropractic Degree, MChiro

## EXPERIENCE

**CHIROPRACTOR** Top Chiropractic London  
2023-24

- I worked in central London with a high-end clientele, many of whom presented with complex neurological conditions requiring precise and specialised care.
- During this time, I underwent extensive training in 3D Cone-Beam Computed Tomography (CBCT) and Paraspinal Digital Thermography, enhancing my diagnostic capabilities and clinical precision.
- I also actively contributed to the chiropractic community by delivering public talks and hosting student meetings to promote awareness, education, and dialogue around chiropractic care.

**CHIROPRACTOR** Atlas Specific Chiropractic  
2024-25

- I run my own Upper Cervical Clinic in Scotland, where I manage all aspects of the business and successfully built a full patient diary within just three months.
- To grow the practice, I developed strong referral relationships with local businesses and collaborated with chiropractors internationally.
- Through this work, I gained valuable experience caring for patients with chronic neurological conditions and complex mental health challenges, delivering care that was both clinically precise and deeply empathetic. I also came to understand first hand the financial, emotional, and social demands of independently operating a service-based healthcare business.
- Most recently, I undertook training to capture and report on my own CBCT images at a dental practice in Leith, Edinburgh. Through initiative and relationship-building, I became the first practitioner in Scotland to perform a 3D scan of the craniovertebral junction and deliver an on-site, calculated correction based on the imaging.

**THOMPSON/DIVERSIFIED CHIROPRACTOR** Chiro London  
2025-Now

- I am currently based at Chiro London's Edinburgh outpost, where I have been covering for Dr. Brady during his absence, as well as building my own client-base. In this role, I have independently managed a high-volume diary of 250 patient visits per week across three clinic locations.
- This experience has enabled me to:
  - Confidently run a high-volume chiropractic clinic with efficiency and consistency.
  - Develop expertise in caring for the geriatric population using a tailored combination of activator methods, drop-piece adjustments, and extra-spinal techniques.
  - Conduct streamlined and effective New Patient Examinations, including providing safe and appropriate care during the first visit.
  - Engage in empathetic yet time-conscious conversations with clients, even when addressing complex or sensitive issues.

General  
Chiropractic  
Council
